

How to Use Class Dojo!

We are going to use **Class Dojo** for:

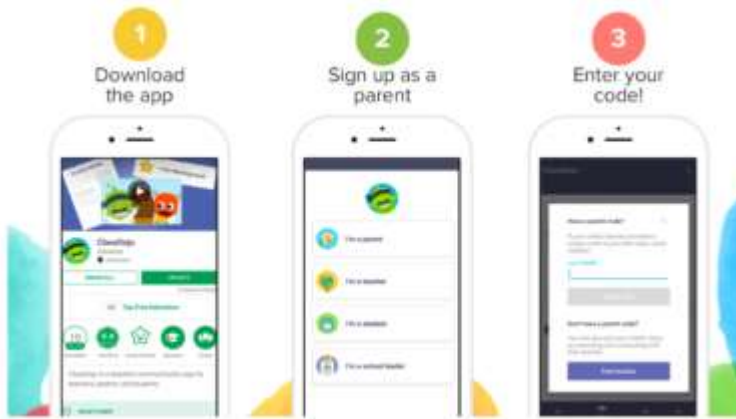

- Setting and receiving homework – twice a week
- teacher and parent communication – the teacher will check messages twice a week
- learning zone if school was closed

We would like you to use it too!

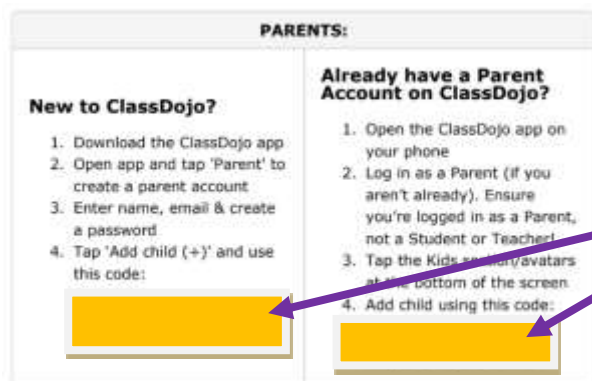

You can use it on a phone, tablet or computer!

To use Class Dojo on a phone/tablet go to:

- download the app
- sign up as a parent
- go to the "kids" tab
- select "add a child"
- click 'use this code' and input the **INDIVIDUAL CODE** you have been given
- If you have more than one child – add all of the codes so they can all access their learning

Use your individual code for your child

On the app, you can switch the user between parent and child from the icon in the top left corner:

- As a parent – read and send messages
- As a child – see and complete homework

For more detail see this video which shows you how to access and complete homework on the Class Dojo app: <https://youtu.be/ZnpX5ABfPnQ>

If you will be using Class Dojo on a computer:

- Go to **classdojo.com** on any web browser (Edge/Chrome/Safari/Firefox)
- Login as a parent
- **Send a message to Mrs Beeley (Abbey Campus) or Mr Parry (Highfields Campus) and tell them you are using a computer/not using the app**
- They will message you back with details of how your child can login – you need to log in separately on a computer, you cannot switch the user from within a parent login, like you can on the app
- Login as a parent to see messages from staff
- Login as a "student" for your child to access their homework
